

MENTORING PROGRAM

by GABC Young Professionals

Engage, Learn, Develop, Grow

Mentoring is a partnership with the purpose of learning and growth. It is a proven tool for personal and career development with which both the mentee and mentor have the opportunity to gain from the relationship.

The Mentoring Program by the German-American Business Council Young Professionals (GABC YP) brings together early-career and experienced professionals in purposeful, mutually rewarding relationships. The mentoring relationship is built on mutual trust, respect and communication. It involves engagement of both parties in exchanging ideas, discussing progress and setting goals for further development. The Mentoring Program is open to students, recent grads, postdocs, and any members at the early stages of their careers – and of course to experienced members as mentors.
