

Sustainable Living 2030

Panel Discussion & Networking on a vision for Sustainable Living 2030 through the lenses of living spaces, food and home energy consumption.

Thursday, November 16, 2023
6:00PM - 8:30PM

Atlantic Wharf
290 Congress Street in Boston

\$30 Member
\$50 Non-member

Join us for a Panel Discussion and Networking Evening!

Sustainable Living 2030: The importance of achieving sustainable living touches upon many aspects of our lives. In this upcoming event, we are excited to shed light on the vision of business leaders on sustainable living in 2030 that impact our personal lives, from food we produce and eat (and not waste), to home energy consumption and reduction, to sustainable living spaces.

Join us for an engaging **panel discussion** and a chance to **network in person**. Our panel of experts will provide insights on how the industry responds to climate action, what consumers can do themselves, and how the sustainable future in our own homes and communities may look like:

Biographies of the Speakers

ALEXANDER WUTHNOW

President and CEO
BOSCH Home Comfort
Group North America

Alexander Wuthnow is the Regional President and CEO of the Bosch Home Comfort Group, the North American division for sustainable heating & cooling solutions of the German multinational Bosch Group. In his current role, he is responsible for delivering the company's highly innovative solutions, including heat pumps, to the fast-growing North American HVAC market. Alexander has served in various leadership roles since 2006, most recently as SVP of Sales and Portfolio Management for the Bosch Home Comfort Group in Europe.

PHILIP BEHN

Partner
McKinsey & Co.
(former CEO of
Imperfect Food)

Philip Behn is a Partner in the Boston office of McKinsey & Company, and a leader in their Retail and Digital practices in North America, where he focuses on food sustainability and digital transformation. Until recently, Philip was CEO of Imperfect Foods, where he built, scaled, and led an online grocery business with a mission to eliminate food waste. Prior to that, Philip spent a decade at Walmart building eCommerce businesses in food, groceries, and general merchandising.

TRISTAN FOERSTER

CEO
ClimatePartner LLC

Tristan Foerster joined ClimatePartner, a climate action strategy & consulting company, as Co-Founder and CEO in 2011 and is currently heading its US subsidiary. Early in his career, he served as executive assistant to Roland Berger where he also spent several years advising banks and insurance companies. Tristan collected extensive experience in business development and internationalization of online service providers and has founded a number of online media and e-commerce start-ups, among them PriceCrash AG.

BEN BIXBY

CEO
Saturday Robotics

Ben Bixby is the CEO of Saturday Robotics, a venture-backed startup in Boston that is developing AI-powered, robotic wash centers to make laundry both radically sustainable and radically affordable. Previously, Ben had been the GM for Energy & Safety at Nest and Google where he deployed novel hardware, software, and services to help households achieve their individual goals of comfort and control while collectively producing prodigious energy savings and enabling a new generation of distributed demand response programs for the grid. Ben had arrived to Google by way of its acquisition of Nest, and earlier at Nest by way of its acquisition of his first company: MyEnergy.

LIGE SUN

Associate Partner
McKinsey & Co.

Lige is an Associate Partner in the Boston office of McKinsey & Company, and a leader in their Chemicals and Agriculture practice in North America. She focuses on sustainability business building in food, agriculture, and advanced industries.
