

Transformation to a Sustainable Infrastructure

Panel Discussion & Networking

Thursday, March 14, 2024
6:00PM – 8:30PM

Atlantic Wharf
290 Congress Street in Boston

\$30 Member
\$50 Non-member

Join us for a panel discussion on transforming our **infrastructure** for a **sustainable future**, viewed through a transatlantic lens. With global investments of up to \$275 trillion required between until 2050, as outlined in a McKinsey report, the scale of action needed to combat climate change is immense. From **renewable energy initiatives** to **innovative land-use systems**, we'll explore how businesses on both sides of the Atlantic are navigating this transformative journey.

Massachusetts is directly impacted by climate change, with sea levels 8 inches higher than in 1950 and increasing by about 1 inch every 8 years. This underscores the imperative to address climate change locally and globally. Join us as we delve into these critical issues and chart a course toward a more sustainable future.

Biographies of the Speakers

PATRICK SCHULTZ

President and CEO
Veolia North America -
Sustainable Industries

Patrick Schultz currently serves as President and CEO of Sustainable Industries and Buildings (SIB) at Veolia North America. SIB helps a wide range of industrial and commercial customers run profitable and reliable operations while reducing their impact on the environment. Solutions include water, wastewater, energy, and multi-utility operations and maintenance, onsite oily residuals management for refineries, energy efficiency and decarbonization projects, energy advisory and enterprise-level energy management. Prior to joining Veolia, Patrick worked at McKinsey & Company.

PASCAL MITTERMAIER

Global Business and
Sustainability Leader

Pascal Mittermaier's career spans over 30 years, 10 countries, and three industries including healthcare and sustainable development. Formerly Global Managing Director at the Nature Conservancy, Pascal now serves as Board Chair of Nature Sacred; Board member of Ocean Wise; and is Entrepreneur in Residence at Sea-Ahead. Previously, he served as the Head of Sustainability, Europe at Lend Lease, a global property company. Prior to his career path in sustainability, Pascal worked at Roche, where he was Managing Director of Roche in Canada and Italy. He studied Economics and History at the University of Pennsylvania and completed his MSc. in Climate Change and Sustainable Development from DeMontfort University (UK).

KSENIA KALADIOUK

Partner
McKinsey & Co.

Ksenia Kaladiouk is a Partner in McKinsey & Company's Boston Office who serves as a leader in the Electric Power & Natural Gas and Strategy & Corporate Finance practices. She works across the energy value chain with utilities, renewables developers, energy technology players, IPPs and infrastructure investment firms. She is the author of several external publications on the future of the power sector and grid evolution. Ksenia holds a Master of City Planning (MCP) from MIT in Cambridge, MA and a BA magna cum laude from the Cornell University.

JESSICA STAVOLE

Sustainability & Voluntary
Carbon Markets
TÜV SÜD America

Jessica joined Ruby Canyon Environmental, now part of TÜV SÜD America Inc., in 2014 where she was instrumental in leading the company's expansion into both the sustainability field and aviation sector. Jessica is certified in sustainability reporting and has served as lead verifier for the Airport Carbon Accreditation and CORSIA programs, carbon offset projects, and corporate greenhouse gas inventories. Jessica holds a M.Sc. in Environmental Science & Energy, and a Master of Public Affairs from Indiana University Bloomington.

TIM MATTHEY

Engagement Manager
McKinsey & Co.

Tim Matthey is Engagement Manager at McKinsey & Company where he supports clients across the Energy, Industrials, Manufacturing and Distribution space. He recently co-authored an [article about the Offshore Wind Market](#). Tim holds an MBA from the MIT Sloan School of Management as well as business degrees from the UK and Germany. Tim joined McKinsey in 2017.
